

MY IDEA FOR SELF DESIGNED APP:-

I want to design a TODO APP which will help people let know which tasks are remaining to do, which tasks are done and which tasks are currently being performed. This will help them do their tasks easily and quickly.

USER STORIES FOR TODO APP:-

ADMINISTRATOR:-

As an administrator, I want users to sign up and login to the app so that they are authenticated users.

As an administrator, I want users to add their todos list to the app so they can classify and see which tasks are left to do, the tasks which are done and the tasks which they are performing.

USER:-

As a user, I want to add my todos list to the app so that I can classify my tasks and I can know which tasks are remaining to do.

As a user, I want to classify my todos list to - 'Todos Remaining', 'Todos Done' and 'Todos doing' so that I can know which tasks are done which are remaining and which I am currently doing.
